

BLADE™

Precision Optical Gaming Mouse

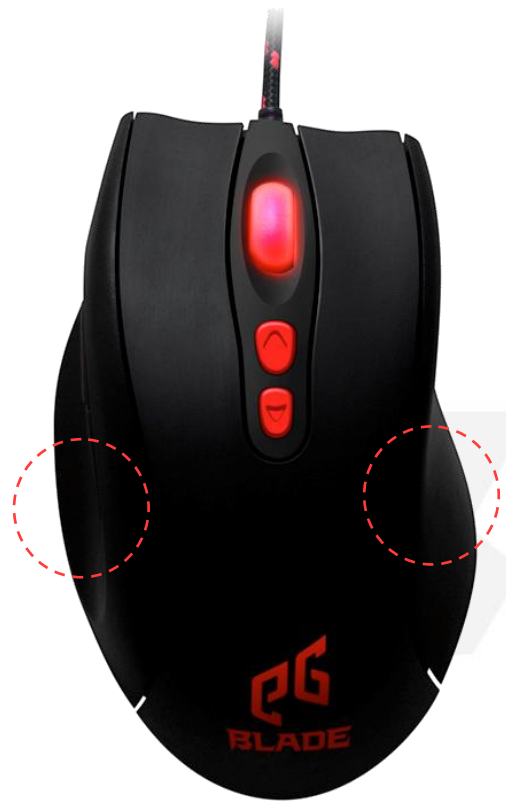

EpicGear is proud to announce the launch of EG’s latest optical gaming mouse – Blade. Like a swift katana of the samurai, with the agility-focused ergonomics and gaming grade optical sensor, the deadly Balde takes out each opponent quickly and silently, providing gamers with an edge in every match.

Control Focused Ergonomics & Gaming Grade Optical Precision

The ergonomic design of the right-hand-oriented Blade is perfect for the palm and claw grip gamers that demand total control. Featuring anti-slip coating, 10 levels of on-the-fly DPI LED-indicated adjustment, minimized lift-off distance and gaming-grade optical sensor, Blade is the ultimate weapon of choice when it comes to control and precision.

Gaming Enhanced Durability

Besides the form-follows-function ergonomic design, Blade is equipped with gold-plated USB connector and gaming-grade braided cable to ensure the highest durability under maximum stress. Main left and right buttons are made with longevity keys in exceed of five million clicks.

Gaming ergonomics with focused on thumb grip and ring finger squeeze for maximum control and comfortable grip

Longevity keys of five million clicks

10 levels of On-the-fly dpi adjustment

Extended thumb-rest support design for comfort even after long hours of playtime
